

EQ EventQR

The complete guest-experience platform — from invite to the door, and everything inside.

Invitations & RSVP · WhatsApp/SMS/Email · QR check-in · venue access & zones · seating ·
catering · merch & gift logistics · gift registry — one platform, pay per event.

Built for Nigeria 🇳🇮 & the US 🇺🇸

events.vsgs.io

THE PROBLEM

Running an event still means stitching 6 tools together

- **Invitations & RSVP** live in WhatsApp threads, paper cards and spreadsheets.
- **Check-in** is a printed list and a pen — slow queues, no real-time view.
- **Access control** for VIP / backstage / zones is manual and error-prone.
- **Catering headcount** & meal choices are guessed — waste and shortfalls.
- **Aso-ebi / merch & gifts** logistics tracked off-platform.
- No single **live dashboard** — organizers fly blind on the day.

The cost

Planners juggle ticketing apps, invite tools, spreadsheets, and group chats. Data is fragmented, the guest experience is clunky, and there's no system of record for the event.

Social celebrations (weddings, owambe) and corporate events share the same pain — and no tool serves both well, in both markets.

THE SOLUTION

One platform for the whole event lifecycle

Invite & RSVP

Branded pages, WhatsApp/SMS/email, approvals

QR check-in

Personal QR per guest — instant, no app

Venue access

Zones + rules + gates; in/out, live occupancy

Seating & catering

Auto-seating; meals; live kitchen orders

Logistics & registry

Ship aso-ebi/merch & gifts; gift registry

Live dashboard

Check-in, RSVP, occupancy & per-table

Live

WHO IT'S FOR

One platform, many beneficiaries

Event planners

Run every client event end-to-end from one dashboard — and reuse it across every event you manage.

Halls & venue owners

Offer QR check-in, zone access & live occupancy as a venue amenity that wins bookings.

Corporate organizations

Conferences, AGMs & town halls — badge/zone access, controlled rooms, attendance analytics.

Hosts & guests

Weddings, owambe & parties — free to start, WhatsApp invites, effortless RSVP & tickets.

Caterers

Exact meal counts & per-table orders — cook to the real headcount, not a guess.

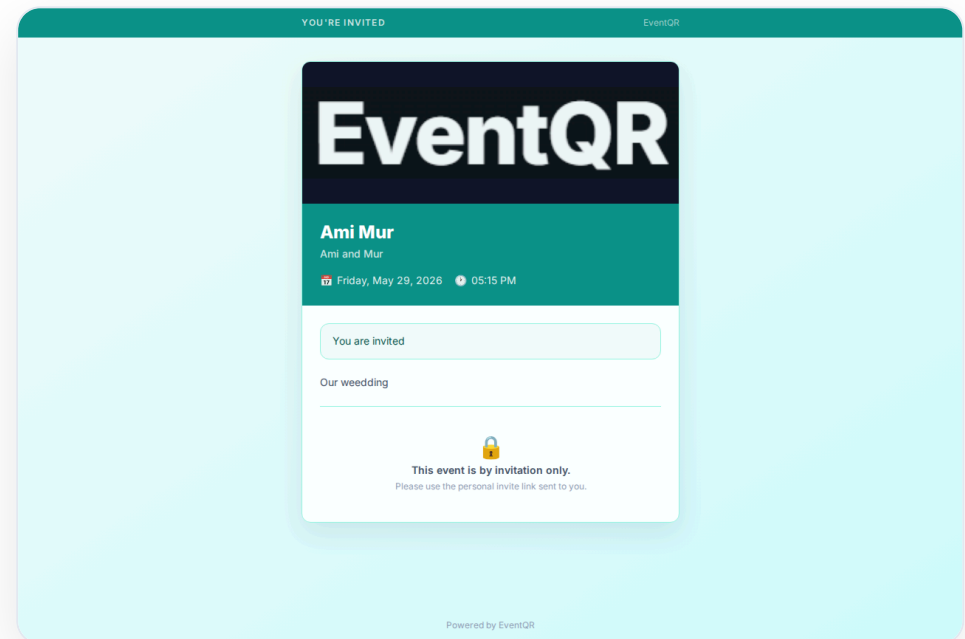

Rentals & vendors

Packing lists & tokenized vendor pages for aso-ebi, merch & equipment fulfilment.

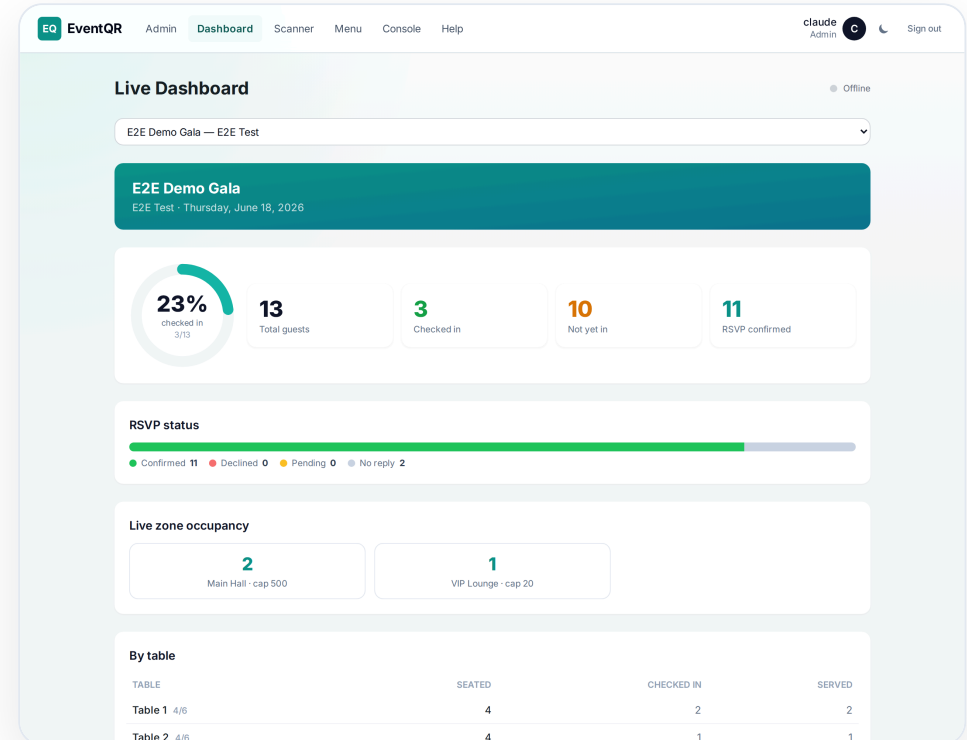

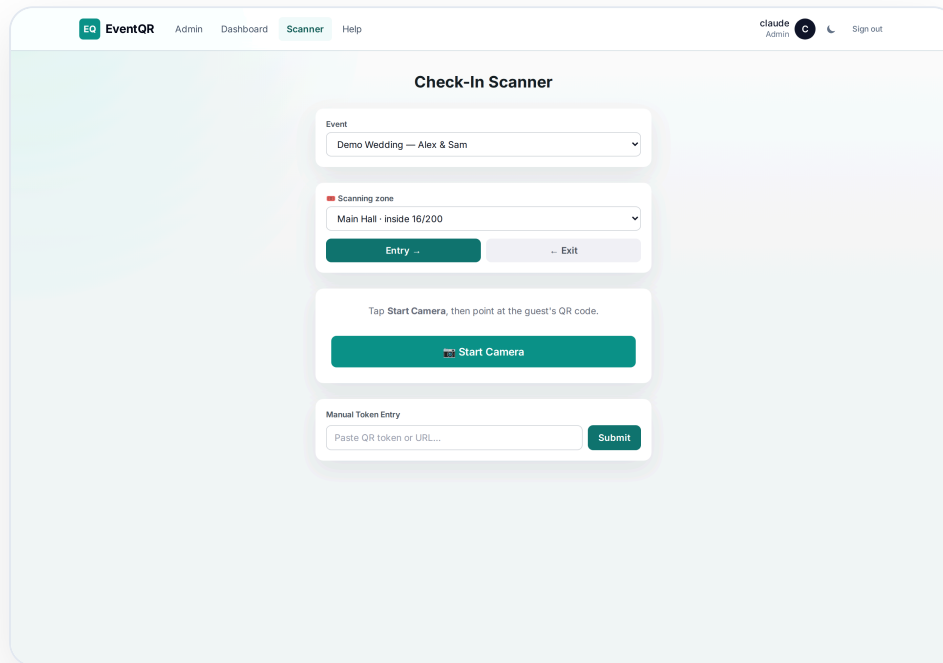

Also serving associations & alumni bodies, religious organizations, NGOs, and ticketed / public events.

Self-serve RSVP on the channel guests actually use

- Themeable invite pages — **open** link or **unique per-guest** link.
- **WhatsApp, SMS & email** invites, reminders and broadcasts.
- Custom RSVP questions, deadlines, approvals, plus-one pairing.
- Import from CSV/Excel or a live Google Sheet — or self-serve sign-ups.
- Tickets (QR) issued automatically on confirmation.

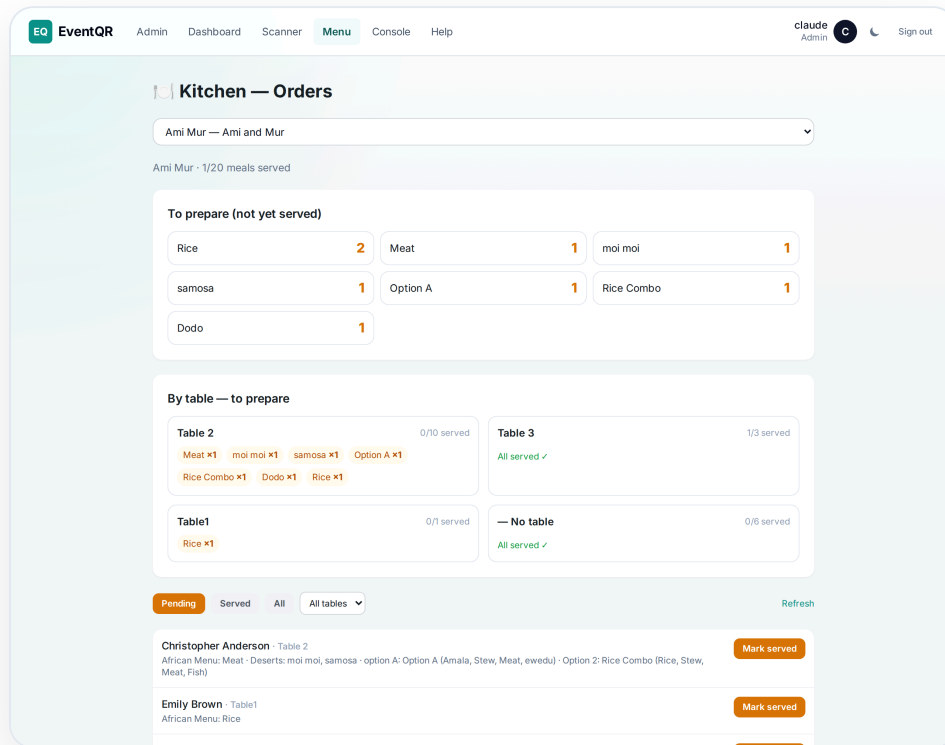

QR check-in, multi-zone access control & a live dashboard

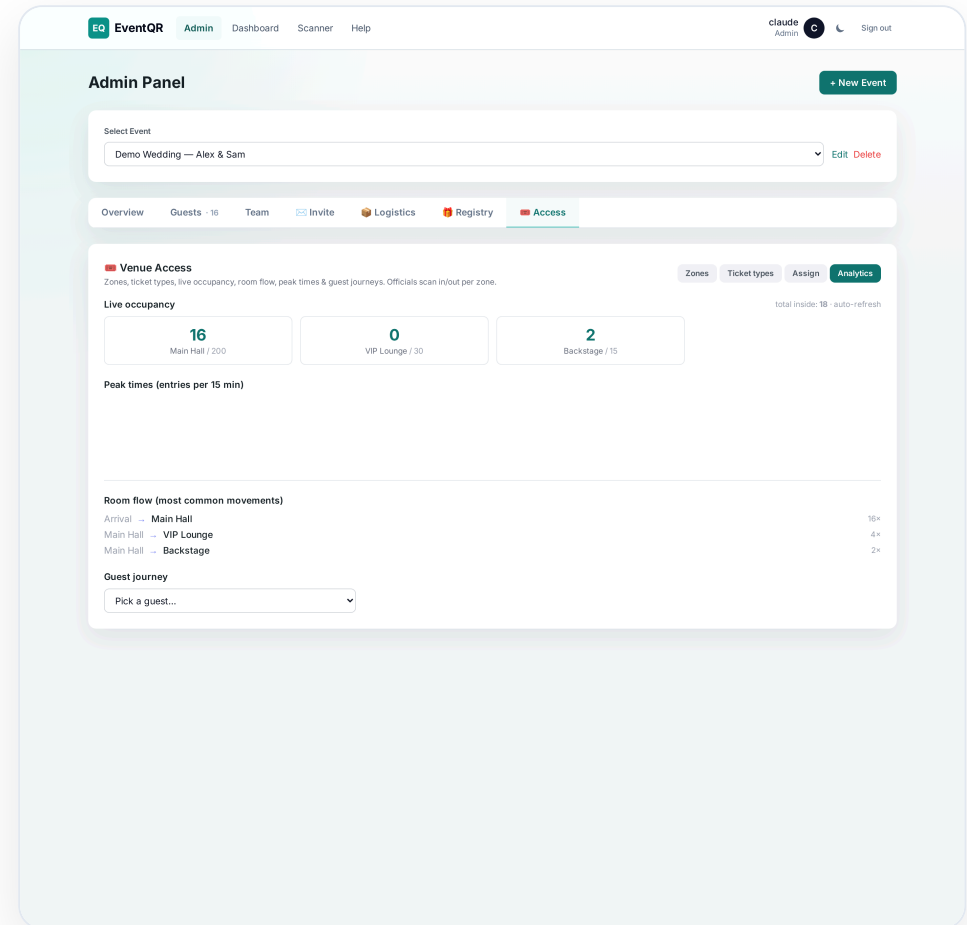

Gates pin a scanner to a zone + direction — staff just scan; access is decided automatically from each guest's **tags/ticket type**. The dashboard shows check-in, RSVP, **live zone occupancy**, catering and a **per-table report** in real time.

Catering by table & venue intelligence

Kitchen view — what to prepare, per table, with served progress. A dedicated staff role sees only this.

Venue analytics — live occupancy, peak times, room-to-room flow and per-guest journeys.

MARKET OPPORTUNITY

Two large, under-served markets — one platform

Nigeria & West Africa

A massive culture of social celebration — weddings, **owambe**, naming & burial ceremonies — with **aso-ebi** logistics, large guest lists and cash gifting. Tooling today = WhatsApp + spreadsheets + cash.

Edge: WhatsApp-first invites, Naira pricing (Paystack), aso-ebi logistics, family-event seating.

United States

A mature, multi-billion-dollar events industry — weddings, corporate, galas, conferences — that still splits across ticketing, invitation and check-in point tools.

Edge: one system from invite to access control, premium check-in at SMB pricing, no subscription lock-in.

[TAM]

Total addressable — verify & size

[SAM]

Serviceable — NG socials + US SMB events

[SOM]

3-yr obtainable target

Market-size figures are placeholders — populate with sourced data before external use.

Everyone owns a slice. Nobody owns the whole event.

United States

- **Eventbrite** — public ticketing; not invitations/seating/catering/access.
- **Cvent** — enterprise & pricey; corporate, not social/SMB.
- **zipster** — premium guest-list + check-in for galas; no RSVP issuance, registry, logistics or local payments.
- **RSVPify / Paperless Post / Joy / Zola** — invites & RSVP only.
- **Partiful / Luma** — social invites + light check-in; no zones/seating/catering.

Nigeria

- **Tix.africa / Nairabox / Tickethub** — ticketing for paid/public events.
- **Eventbrite** — used, but not localized for social ceremonies.
- **Listing/discovery apps** — find events, not run them.
- **The reality:** weddings & owambe run on **WhatsApp, spreadsheets & cash** — no integrated invite → access → catering → logistics system.

White space = our wedge

WHY WE WIN

The only platform that does it end-to-end

Why EventQR wins and keeps winning

- **End-to-end system of record** — one dataset from invite to the door to the table.
- **Dual-market by design** — WhatsApp + Naira for Nigeria; premium check-in + USD for the US.
- **Access intelligence** — tag-driven zones & gates big ticketing tools don't offer.
- **Operations others ignore** — catering-by-table, aso-ebi/merch logistics, gift registry.
- **Frictionless pricing** — free to start, pay per event, no subscription.
- **Multi-tenant & roles** — orgs, staff roles (scan / menu / dashboard), operator console.

Built & live today

Not a concept — the full platform is deployed and running, multi-tenant, with billing, messaging providers and an operator console.

BUSINESS MODEL

Revenue scales with events, not seats

- **Free tier** — email invites, up to 25 guests, EventQR branding. Top of funnel.
- **Event Pass (per event)** — unlocks SMS/WhatsApp, QR check-in, seating, venue access, logistics, registry, more guests, no branding. Tiered by guest cap.
- **Message credits** — top-ups for SMS/WhatsApp at margin.
- **Add-on / enterprise** — premium support, custom domains, data residency (planned).

No subscription → low friction, high conversion; revenue compounds with event volume and repeat organizers.

Simple, per-event pricing

Pay once per event — no subscription. Free events are email-only, capped at 25 guests. An Event Pass unlocks SMS/WhatsApp, more guests, and removes branding.
